5. Balanced diet and exercise were also involved in the interaction.
6. Interactive discussion about alcohol, smoking and substance abuse etc were held with the students.
7. The importance of understanding oneself and communication skills.

# Health and Hygiene Report – Harchandpur Village on 6th November,2017

The workshop was held at primary school. The principal helped in organizing the workshop.

There were an approximate of 40 students from classes 1st to 5th between the age range of 6 years to 10 years. Students were educated about the meaning of hygiene and well being. They were given tips to maintenance of oral hygiene, hair hygiene, ear hygiene, water hygiene, food hygiene and sleep hygiene. Information about the causes of diseases like malaria, dengue and chickungunea were given and students were told about the importance of changing water in the coolers, pots, coconut shell etc. They were engaged in various group activities to facilitate the learning.

The importance of washing hands before and after eating using soaps and sanitizers, clean towels and sleeping on clean bed sheets were elaborated on. They were educated about taking care of their well being such their eyes, teeth, taking shower regularly, cutting nails of both hands and feet and wearing clean clothes. They were engaged in various group activities to facilitate the learning.

The students in harchandpur were very intelligent and informed as compared to other schools visited. The teachers had better relationship with the students. And students were very interested in learning, participation and self discipline of the students was amazing here
